DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 6 and 7), filed 1/17/2007, with respect to claims 1-12, 14, and 15 have been fully considered and are persuasive. The rejection of claims 1-12, 14, and 15 has been withdrawn.

Allowable Subject Matter

2. Claims 1-18 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* Rejected claims have been amended to overcome the rejection under 112 and 101;

* The present invention provides a new method, system and computer product for identifying foreground segments in a compressed electronic image without requiring intensive computations that can substantially increase processing times and costs (see specification, page 2, first and second paragraphs).

Particularly, the new method, system and computer product comprise the following features, which the prior art taken either singly or in combination does not teach:

- extracting a set of DCT coefficients... of the block; computing sum of the set of DCT coefficients; analyzing the sum to determine if the block is part of a foreground segment (see independent claim 1);

- means for extracting... of the block; means for computing a sum of the extracted frequency coefficients for each block; means for analyzing the sum to determine if the block is part of a foreground segment (see independent claim 8);

- a system for extracting... the JPEG image; a system for computing... for each block; a system for analyzing... a foreground segment (see independent claim 13).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
